"Our only child, about three years of age, was attacked by simples on his forehead. They rapidly spread until they formed a loathsome and virulent sore, which covered his face, and actually blinded his eyes for some days. A skilful physician applied nitrate of silver and other remedies, without any apparent effect. For fifteen days we gaurded his hands, lest with them he should tear open the testering and corrupt wound which covered his whole face. Having tried every thing else we had any hope from, we began giving your Sarsaparatilla, and applying the loadide of potash lotion, as you direct. The sore began to heal when we had given the first bottle, and was well when we had five hed the second. The child's eyelashes, which had come out, grew again, and he is now as healthy and fair as any other. The whole neighborhood predicted that the child must die."
